Physiotherapy

Physiotherapy

Physiotherapy treats infants, children, and young adults with impaired movement.

It is to promote development of movement to pave the way to a more independent lifestyle and expand opportunities for participation in social life.

Our offering

Medical-therapeutic examination and treatment of:

- developmental delays,
- neurological abnormalities,
- conditions of the respiratory tract,
- conditions of the musculoskeletal system,
- follow-up treatment after accidents and operations,
- postural abnormalities,
- determination of the requirement of assistive devices.

Target groups

- Treatment of infants, toddlers, school-age children, and young adults up to 18 years of age
- Counseling of caregivers

Registration

Clients are registered by their doctors via a prescription for physiotherapy.

Costs

Costs will be covered by health, disability, or accident insurance.
